

Welcome!

We champion the power of creative well-being through art and radical inclusivity.

We are a community of creatives who affirms humanity first, art second.

The impact of visual arts, storytelling and creative expression can be transformative.

We believe everyone is inherently creative. Art is culturally relevant, can promote emotional wellbeing and amplifies diverse voices. We are committed to lifelong un/learning, social action, and inclusive community building.

We are pro human rights, civil liberties, Black lives matter, LBGTQ+ and climate justice. We invite you to co-create welcoming, equitable and socially-aware experiences with us.
